## ACRYLIC SIGN FRAMES

Acrylic Sign Frames are a carefully constructed acrylic-based sign system for identification and directional sign applications. Available in a variety of sizes and colors, Acrylic Sign Frames assure sign uniformity and consistency within any facility. Permanent identification signs, changeable message signs, conference room signs, directories and ADA compliant signs are all accomplished with a single, unique design.

Acrylic Sign Frames are immediately available in standard Kroy colors with choice of radius or square corner profile. Kroy colors are conveniently stocked for quick delivery and custom colors are achieved with Kroy's advanced color matching process. Custom colors are available to match any architectural color specification.

Acrylic Sign Frames are also provided with a choice of lettered or unlettered message inserts. Sign message inserts are updatable using interchangeable polystyrene inserts, custom laminate inserts, digitally printed inserts or permanent tactile faceplates with raised graphics. A diverse selection of graphic options provide designers and facility planners with greater message flexibility while maintaining the functionality of individual signs.

Faceplates are precision laser cut and finished with a subsurface frame border. If permanent room identification or ADA sign compliance is a requirement, a photopolymer acrylic lens with 1/32" raised tactile graphics and Grade II Braille serves as the faceplate. Kroy Sign Systems utilizes an advanced photopolymer process and materials to create faceplates that match specifications provided by architects, designers and facility managers. Sign message inserts may also be used in conjunction with the photopolymer acrylic lens.

For more information on this or other Kroy Sign products, call 1-800-950-5769, send us an email or visit us on the web.

#### Standard Kroy Sizes and Styles

#### Summary: 2010 ADA Standards for Accessible Design

Letters and numerals shall be raised 1/32" upper case sans serif type and shall be accompanied with Grade II Braille. Raised characters shall be at least 5/8" high, but no higher than 2". Pictograms shall be accompanied by the equivalent verbal descriptions placed directly below the pictograms. The border dimensions for the pictogram shall only be 6" in height. The characters and background of sign shall be eggshell, matte or other non-glare finish. Characters and symbols shall contrast with their background - either light characters on a dark background or dark characters on a light background.

- Raised tactile text and Grade II Braille complies with Americans with Disabilities Act (ADA) guidelines.
- High impact plastic frames are resistant to vandalism.
- Add a logo to improve company identity.
- Interchangeable styrene, laminate or digitally printed inserts provide quick, simple and inexpensive sign updates
- Include changeable message inserts or a conference room slider for tenant/room status.
