KROY

Sign Systems

ADA SIGNS-INJECTION MOLDED

Kroy Sign Systems manufactures architectural and ADA (Americans with Disabilities Act) signs for safety and identification applications.

Injection Molded ADA signs feature UV resistant, high impact polystyrene panels that are 8.0" inches square and 1/8" inch thick. Raised white pictograms, text and Grade II Braille insure that ADA and ISA (International Symbol of Accessibility) requirements are achieved. A variety of sign messages are available including restroom signs in English & Spanish translations.

Kroy Injection molded ADA Signs are stocked in four (4) popular colors, Blue, Black, Brown and Dark Gray. Kroy signs comply with federal regulations for the visually impaired. Sign panels are ready to install and suitable for facility interior and exterior applications.

Clear Injection Molded ADA Signs allow Kroy to quickly achieve unlimited colors and specific color combinations that customers require. Signs are back-painted and finished with polyurethane paint to match any PMS (Pantone Matching System) or paint manufacturer color.

Kroy Injection Molded ADA signs are highly visible, durable and affordable. Distributors and customers are assured of experienced manufacturing, quality sign products, timely delivery, written warranties and customer support.

Optional injection molded frames are also available in Black, Brown, Beige, White, Gray and Dark Gray to enhance the sign appearance and provide additional sign panel mounting options.

For more information on this or other Kroy Sign products, call 1-800-950-5769, send us an email or visit us on the web.

Summary: 2010 ADA Standards for Accessible Design

Letters and numerals shall be raised 1/32" upper case sans serif type and shall be accompanied with Grade II Braille. Raised characters shall be at least 5/8" high, but no higher than 2". Pictograms shall be accompanied by the equivalent verbal descriptions placed directly below the pictograms. The border dimensions for the pictogram shall only be 6" in height. The characters and background of sign shall be eggshell, matte or other non-glare finish. Characters and symbols shall contrast with their background - either light characters on a dark background or dark characters on a light background.
