

Standard Margins: Space on the top, bottom and side edges of the styrene insert or tactile plate: 1/2"

Interline Spacing: The amount of space between lines and copy.

- A. Standard is 1/2 of letter size.
- B. If different letter sizes are combined, the standard interline is 1/2 of the largest letter size.

Center justified copy: Longest line of copy is centered horizontally and all other lines on the sign are left justified with this line.

Braille: Braille is positioned directly below last line of text, aligned according to copy placement. When text and braille are used, only text is used for positioning if space is allowed.
